Contents

Preface xi

Publication Committee xii

Contents xiii

1. Extremely high density recording and its applications

R. Wood, Y. Sonobe, Z. Jin and B. Wilson
Perpendicular recording: the promise and the problems (*invited paper*) 1

H. Muraoka and Y. Nakamura
Overview of read/write scheme for perpendicular magnetic recording utilizing single-pole head and double layer media (*invited paper*) 10

H. Okuda and T. Kurioka
Storage technology for television home server (*invited paper*) 20

2. Perpendicular media I

A. Kuroda, Y. Nishida, A. Nakamura, K. Tanahashi, H. Takano, S. Narishige, H. Aoi and Y. Nakamura
Thermal decay estimation of perpendicular magnetic recording 25

K. Motohashi, T. Samoto, S. Yoshida, H. Wako and S. Onodera
Magnetic activation volumes of obliquely evaporated Co–CoO tape 30

T. Keitoku, J. Ariake, N. Honda and K. Ouchi
Preparation of Co–Cr–Pt alloy film with high perpendicular coercivity and large negative nucleation field 34

T. Onoue, T. Asahi, K. Kuramochi, J. Kawaji, T. Homma and T. Osaka
Improvement of signal to noise ratio for Co/Pd multilayer perpendicular magnetic recording media by the addition of an underlayer 40

H. Ohmori and A. Maesaka
Magnetic properties and noise characteristics of Co/Pd multilayer perpendicular magnetic recording media 45

J.-Y. Kim, B.-K. Lee, G.-S. Park, M. Uchida, T. Kurosawa, S. Watanabe, J. Ariake, N. Honda and K. Ouchi
The effect of Pd buffer layers on magnetic exchange energy of Co/Pd multilayered films for perpendicular magnetic recording 53

K. Tanahashi, N. Shimizu, A. Kikukawa, Y. Takahashi, Y. Honda, A. Ishikawa and M. Futamoto
Low-noise CoCrPt/FeTaC double-layered perpendicular media with NiTaZr intermediate layer 59

F. Nakamura, T. Hikosaka and Y. Tanaka
Low noise multi-layered FeAlSi soft magnetic films for perpendicular magnetic recording media 64

A. Kikukawa, K. Tanahashi, Y. Honda, Y. Hirayama and M. Futamoto
Distributions and characteristics of spike noise 68

H. Nakagawa, Y. Honda, A. Kikukawa, K. Tanahashi, A. Ishikawa and M. Futamoto
Effects of thin carbon intermediate layer on magnetic and structural properties of perpendicular recording media 73

I. Tamai, T. Yamamoto, A. Kikukawa, K. Tanahashi, A. Ishikawa and M. Futamoto
Improvement of the crystallographic orientation of double-layered perpendicular recording media by using CoCr (Mo)/Cu intermediate layers 78

T. Onoue, J. Kawaji, K. Kuramochi, T. Asahi and T. Osaka
Effect of underlayers on magnetic properties of Co/Pd multilayer perpendicular magnetic recording media 82

T. Asahi, K. Kuramochi, J. Kawaji, T. Onoue, T. Osaka and M. Saigo
Analysis of microstructures for Co/Pd multilayer perpendicular magnetic recording media with carbon underlayer 87

E.W. Soo, J.P. Wang, C.J. Sun, Y.F. Xu, T.C. Chong and G.M. Chow
The effects of NiP seed layer in Co-alloy perpendicular thin film media 93

H. Okuo, T. Onoue, T. Asahi and T. Osaka
Relationship between surface energy and preferred orientation of CoCr alloy magnetic thin films deposited on C and TiCr underlayers 98

0304-8853/01/$ - see front matter

Y. Ikeda, Y. Sonobe, G. Zeltzer, B.K. Yen, K. Takano, H. Do and P. Rice
Microstructure study of CoCrPt/Ti/NiAl perpendicular media 104

G. Yan, J. Ariake, T. Kiya, N. Honda and K. Ouchi
(Co_xFe_{100-x})–Hf–O granular films as back layers for perpendicular recording media 110

G. Sáfrán, J. Ariake, N. Honda, K. Ouchi, Z. Czigány, P.B. Barna, M. Menyhárd and G. Radnóczi
XTEM and AES study of the microstructure for high density Co–Cr–Nb–Pt double layered perpendicular magnetic recording media 115

S. Saito, Y. Hatta and M. Takahashi
Variation of magnetic properties along the film thickness in perpendicular thin film media investigated by optical method 120

Y. Honda, K. Tanahashi, Y. Hirayama, A. Kikukawa and M. Futamoto
MFM study of magnetic interaction between recording and soft magnetic layers 126

S. Yamamoto, H. Wada, H. Kurisu and M. Matsuura
High-rate deposition of Co–Cr films with perpendicular magnetic anisotropy by ECR sputtering 133

R.J.M. van de Veerdonk, G. Ju, E.B. Svedberg, D. Weller, S. Tamaru, J.T. Wolfson and J.A. Bain
Real-time observation of sub-nanosecond magnetic switching in perpendicular multilayers 138

3. Perpendicular media II and HDI

M. Uchida, T. Suzuki and K. Ouchi
Preparation of Fe–Pt perpendicular double-layered media with high electric resistivity backlayer 143

S. Ishio, N. Mori, T. Yoshino, H. Saito, T. Suzuki and K. Ohuchi
Magnetic anisotropy field H_k and domain structure in $L1_0$ Fe_xPt_{1-x} films 148

Y. Tateno and K. Iwasaki
Interparticle interaction and magnetic anisotropy in vacuum evaporated Co–O perpendicular magnetic thin film 153

T. Suzuki, T. Tanaka and K. Ikemizu
High density recording capability for advanced particulate media 159

T. Ito, O. Kitakami, Y. Shimada, Y. Kamo and S. Kikuchi
Enhanced grain growth of magnetic granules in Co/oxide granular films 165

K. Kakizaki, H. Watanabe and N. Hiratsuka
The effect of AlN underlayer on *c*-axis orientation of barium ferrite thin films for perpendicular magnetic recording media 169

T. Aoyama, S. Okawa, K. Hattori, H. Hatate, Y. Wada, K. Uchiyama, T. Kagotani, H. Nishio and I. Sato
Fabrication and magnetic properties of CoPt perpendicular patterned media 174

O. Kitakami, M. Ichijo and H. Daimon
Lubrication of surface oxidized Co–Cr thin films by phosphoric and phosphorous acid esters 179

Y. Ohchi and F. Tojyou
The characterization of lubricant on ME tape by TOF-SIMS analysis 183

4. Heads and soft magnetic materials

K. Ise, K. Yamakawa and K. Ouchi
Writing performances of cusp-field single-pole head 187

M. Mochizuki, Y. Nishida, Y. Kawato, T. Okada, T. Kawabe and H. Takano
Study on the write-field profile and intensity of narrow-track-width SPT head 191

W. Seiko, Y. Hoshi and H. Shimizu
Fe and Fe–N films sputter deposited at liquid nitrogen temperature 196

K. Machida, N. Hayashi, Y. Miyamoto, T. Tamaki and H. Okuda
Yoke-type TMR head with front-stacked gap for perpendicular magnetic recording 201

H. Fukuzawa, K. Koi, H. Tomita, H.N. Fuke, Y. Kamiguchi, H. Iwasaki and M. Sahashi
NOL specular spin-valve heads using an ultrathin CoFe free layer 208

S.-i. Wakana, T. Nagai and Y. Sakata
Wide bandwidth scanning Kerr microscope based on optical sampling technique using externally triggerable pulse laser diode 213

S. Yamamoto, S. Horie, N. Tanamachi, H. Kurisu and M. Matsuura
Fabrication of high-permeability ferrite by spark-plasma-sintering method 218

M. Naoe, K. Hamaya, N. Fujiwara, T. Taniyama, Y. Kitamoto and Y. Yamazaki
Selective dry etching of manganite thin films for high sensitive magnetoresistive sensors 223

5. Review and concept of perpendicular magnetic recording

S.-i. Iwasaki
Discoveries that guided the beginning of perpendicular magnetic recording (*invited paper*) 227

J.H. Judy
Past, present, and future of perpendicular magnetic recording (*invited paper*) 235

6. Read/write performance and drive technologies

H. Takano, Y. Nishida, A. Kuroda, H. Sawaguchi, Y. Hosoe, T. Kawabe, H. Aoi, H. Muraoka, Y. Nakamura and K. Ouchi
Realization of 52.5 Gb/in^2 perpendicular recording (*invited paper*) 241

S.E. Lambert, B.M. Lairson, H. Nguy, L. Nguyen, T. Huang, J. Adler and S. Gopalaswamy
Drive integration challenges for perpendicular recording (*invited paper*) 245

Y. Tanaka and T. Hikosaka
Perpendicular recording with high squareness CoPt-CrO media (*invited paper*) 253

Y. Okamoto, H. Osawa, H. Saito, H. Muraoka and Y. Nakamura
Performance of PRML systems in perpendicular magnetic recording channel with jitter-like noise (*invited paper*) 259

H. Sawaguchi, Y. Nishida, H. Takano and H. Aoi
Performance analysis of modified PRML channels for perpendicular recording systems (*invited paper*) 265

7. Perpendicular CoCr system media

T. Shimatsu, H. Uwazumi, H. Muraoka and Y. Nakamura
Thermal stability in perpendicular recording media (*invited paper*) 273

M. Futamoto, Y. Hirayama, Y. Honda, A. Kikukawa, K. Tanahashi and A. Ishikawa
CoCr-alloy perpendicular magnetic recording media for high-density recording (*invited paper*) 281

N. Honda and K. Ouchi
Low noise design of perpendicular magnetic recording media (*invited paper*) 289

T.D. Lee, M.S. Hwang and K.J. Lee
Effects of magnetic layer thickness on negative nucleation field and Cr segregation behavior in CoCrPt/Ti perpendicular media (*invited paper*) 297

8. High perpendicular anisotropy media

R.H. Victora, W. Peng, J. Xue and J.H. Judy
Superlattice magnetic recording media: experiment and simulation (*invited paper*) 305

T. Suzuki, T. Kiya, N. Honda and K. Ouchi
Fe–Pt perpendicular double-layered media with high recording resolution (*invited paper*) 312

9. Oxide perpendicular media and exchange coupling

H. Fujiwara, K. Zhang, T. Kai and T. Zhao
Effect of direct exchange coupling between antiferromagnetic grains on magnetic behavior of ferro/antiferromagnetic exchange coupled polycrystalline layer systems (*invited paper*) 319

T. Hughes, K. O'Grady, H. Laidler and R.W. Chantrell
Thermal activation in exchange biased bilayers (*invited paper*) 329

S. Nakagawa, N. Matsushita and M. Naoe
Perpendicular magnetic recording media using hexagonal ferrite thin films deposited on Pt underlayers and interlayers (*invited paper*) 337

S. Yamamoto, K. Hirata, H. Kurisu, M. Matsuura, T. Doi and K. Tamari
High coercivity ferrite thin-film tape media for perpendicular recording (*invited paper*) 342

Y. Hoshi
New sputter-deposition processes for the formation of thin films with desired structure for magnetic recording (*invited paper*) 347

10. Single-pole heads

K. Yamakawa, K. Taguchi, K. Ise, N. Honda and K. Ouchi
Single-pole recording head design for 100 Gbpsi perpendicular magnetic recording (*invited paper*) 354

J.P. Lazzari
Single pole, single turn, probe GMR head and microactuator for high-density perpendicular recording (*invited paper*) 362

Y. Kanai, R. Matsubara, H. Muraoka and Y. Nakamura
Write field analysis of narrow-track SPT head for GHz response (*invited paper*) 368

S. Tsuboi, H. Matsutera, T. Ishi, N. Ishiwata and K. Ohashi
Read/write characteristics of focused-ion-beam-etched heads for perpendicular magnetic recording media (*invited paper*) 375

11. Read/write characteristics and signal processing

A. Kuroe, S. Muramatsu, H. Fusayasu, A. Murata and M. Kobayashi
Predicted outputs of a high-frequency carrier-type magnetic head for 100 Gbit/in^2 generation 382

S. Tanabe
Transition analysis of magnetic recording heads using FDTD 388

D.T. Wilton, H.A. Shute, S.J.C. Brown and D.J. Mapps
Approximation of shielded MR head output for perpendicular media 393

K.J. Lee, Y.H. Im, Y.S. Kim, K.M. Lee, J.W. Kim, N.Y. Park, G.S. Park and T.D. Lee
Novel simulation model for perpendicular magnetic recording 398

A. Shukh
3D FEM modeling of keeper effect on perpendicular recording 403

J. van Ek, A. Shukh, E. Murdock, G. Parker and S. Batra
Micromagnetic perpendicular recording model: soft magnetic underlayer and skew effect 408

E. Miyashita, K. Kuga, R. Taguchi, T. Tamaki and H. Okuda
Simulation of magnetization patterns of perpendicular media for ultra-high recording density 413

S.J. Greaves, H. Muraoka, Y. Sonobe, M. Schabes and Y. Nakamura
Pinning of written bits in perpendicular recording media 418

Y. Sonobe, D. Weller, Y. Ikeda, K. Takano, M.E. Schabes, G. Zeltzer, H. Do, B.K. Yen and M.E. Best
Coupled granular/continuous medium for thermally stable perpendicular magnetic recording 424

T. Kiya, N. Honda, J. Ariake, K. Ouchi and S. Iwasaki
Detection of extremely high bit density signals with a narrow track width GMR head in double layered perpendicular recording media 429

H. Shigematsu, H. Muraoka and Y. Nakamura
Influence of hard-transition shift on overwrite characteristics in perpendicular magnetic recording 435

C.H. Hee, J.P. Wang, T.C. Chong and T.S. Low
Design of highly oriented (HOR) media for extremely high density recording 440

Y. Uesaka, Y. Nakatani, N. Hayashi and H. Fukushima
Read/write properties of oriented longitudinal recording media 445

T. Komakine, N. Honda, T. Kiya and K. Ouchi
Noise spectrum analysis in perpendicular magnetic recording of double-layered media 450

Y. Nishida, H. Sawaguchi, A. Kuroda, H. Takano, H. Aoi and Y. Nakamura
Noise characteristics of double-layered perpendicular media 454

M. Kitano, E. Miyashita, K. Kuga, R. Taguchi, T. Tamaki, H. Okuda, H. Uwazumi, Y. Sakai, A. Kumagai and A. Otsuki
MFM analysis of recorded bit patterns of perpendicular media 459

Y. Okamoto, M. Sato, H. Osawa, H. Saito, H. Muraoka and Y. Nakamura
MTR coded PRML systems for perpendicular magnetic recording 465

Y. Okamoto, S. Miki, N. Masunari, H. Osawa, H. Saito and Y. Nakamura
A study of timing recovery for perpendicular magnetic recording 470

M. Akamatsu, Y. Okamoto, H. Saito, H. Osawa, H. Muraoka and Y. Nakamura
Error event analysis in perpendicular magnetic recording using double-layered medium 475

Z. Yuan and B. Liu
Double layer magnetic data storage—an approach towards 3D magnetic recording 481

Author index to volume 235 487

Subject index to volume 235 493
